Mission statement Bikerclub online

The Bikerclub online is a new bikerclub for all employees of the Deutsche Post World Net and their families, which are active drivers.

We founded a community for the bike interested employees and we hope, that they feel as good working for the company Deutsche Post World Net as the do in persiut of their interest in biking.

We think positive influences will affect the conditions of our members in the company and during their private time using their bikes.

The main target is, to improve the communication between the members and the company and to carry over important themes like traffic security and accident prevention.

We outline our agenda to encourage people to join this community as a plattform of communication for the private interests of bikers and for the integration in the company Deutsche Post World Net.

The vision of Bikerclub online is specified with the motto „the way is the target and the integration.“

Greetings of Bikerclub's online-founder

Dear biker, dear colleagues,

The new bike season 2007 has already started now. We wish you a season without any accident and that you will have much joy to use your bike on your tours.

Think about the experience, to start up very careful, because all motorists and cyclists didn't notice you as fast, as you can drive with your bike.
